Summary

Edward scissorhands hands model, original model by Indigenous Effects

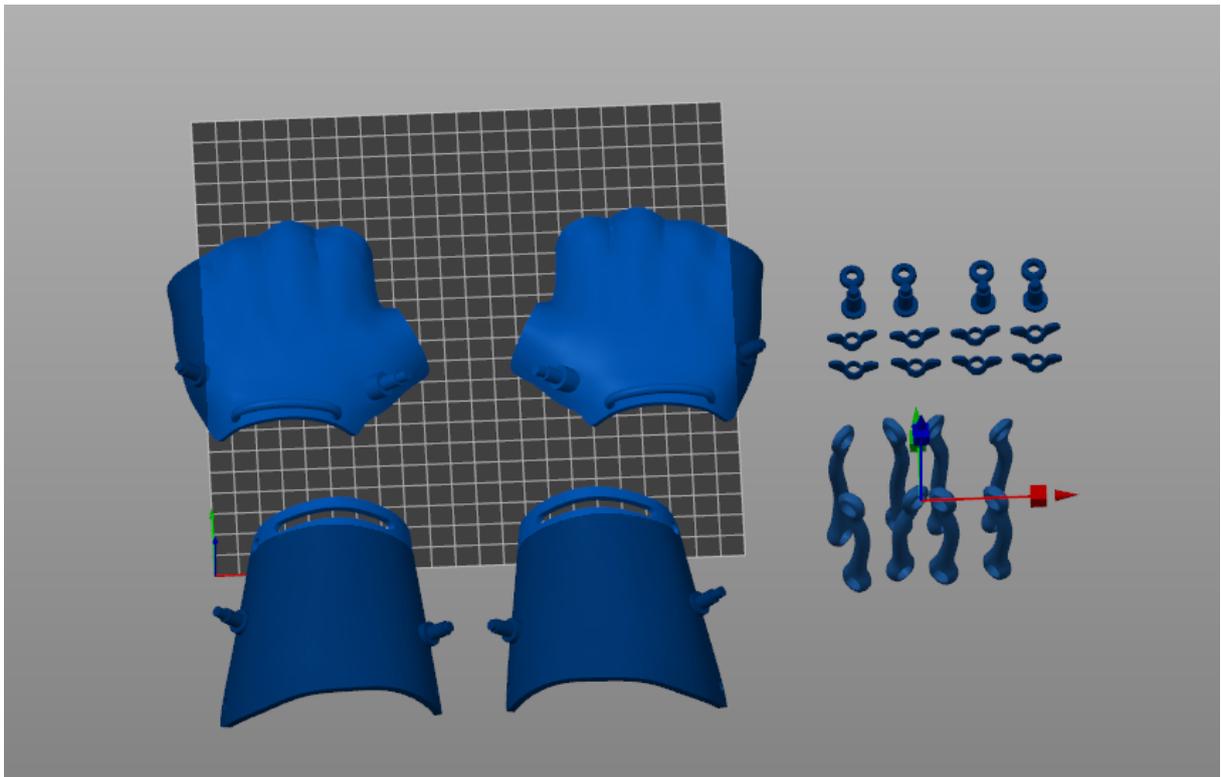

[Costumes & Accessories](#) > [Cosplay & Costumes in general](#)

Tags: [burton](#) [tim](#) [edward](#) [scissorhands](#)

Uploaded authorized by the original modeler [Indigenous Effects](#). Check him out.

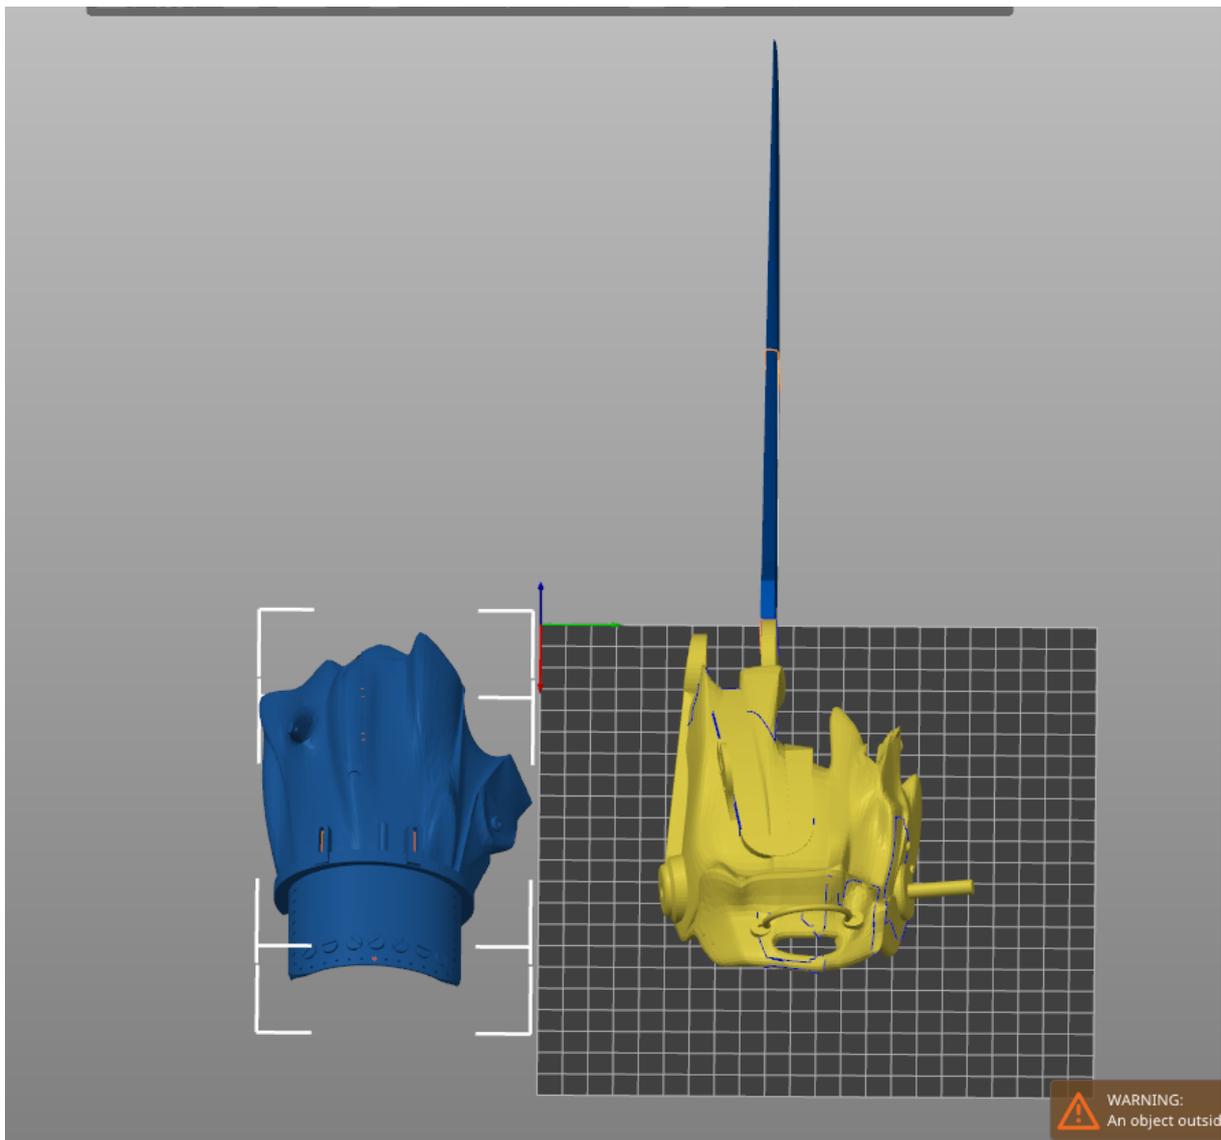

There are two options of covers:

1: Option cover etc... It is compatible with the swing set but are "plain". (Yes the parts list photo is a little it chopped up),

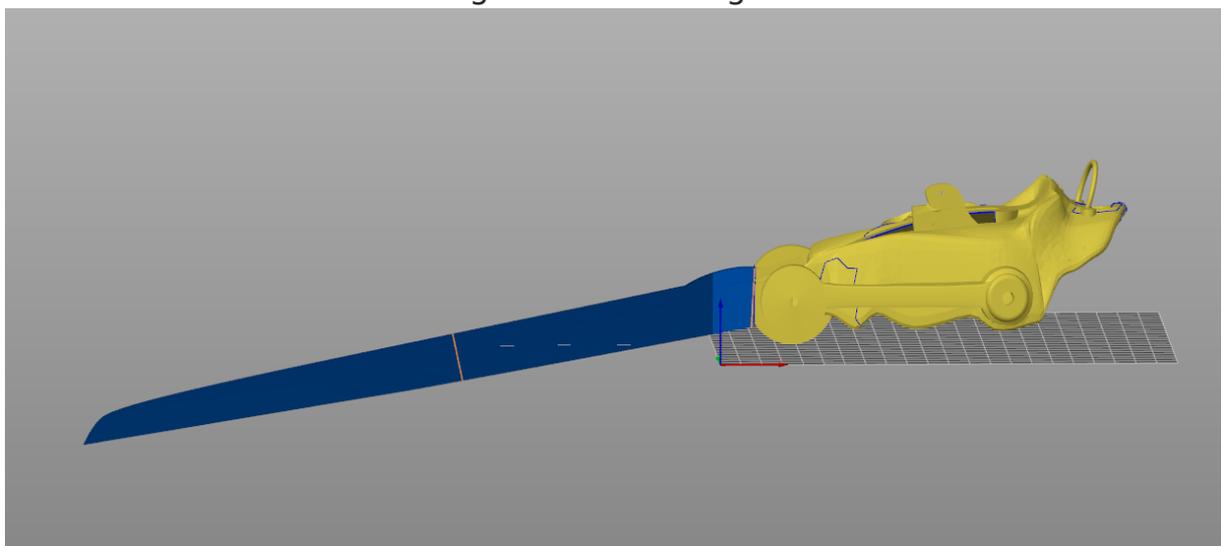

OR

2: Cover left and right.

Needs a little bit of tweak to use, not compatible with swings, has a “right cover blade” that need to be glued into the right cover.

I suggest printing it 30~40 infill, Honeycomb, 3 walls. PETG is great with the layer adesion, otherwise the parts may “crack” underpressure
